IA600 CAMERA PACK FULL BUNDLE NEXT GEN. ADAS EDITION

IA600 CAMERA PACK

The IA600Pro is perfect for mobile or use within the workshop, building on the original Autel calibration frame, the new IA600Pro now offers computerised camera setup saving time and increasing accuracy along with a fully documented reporting to show Pre/ Post Scans, Calibration results and tool setup making it one of the most comprehensive ADAS calibration reports to date.

It's designed for the technician who needs to be able to calibrate all ADAS systems including Lane Departure Warning, Adaptive Cruise Control, Rear Collision Warning, Night Vision, Blind Spot and Radar/Camera collision avoidance systems.

The IA600Pro is sold with a 'full bundle' which includes Camera setup configuration (just like the advanced IA900) plus various patterns and boards packaged together to save the customer money.

There are also an extensive range of extra specialist patterns, boards and simulators to enable the technical to calibrate many static ADAS calibrations.

The Autel ADAS software will also enable the technician to undertake dynamic calibrations, where the car must be put in learn mode, but does not require the use of an ADAS frame.

	PASSIVE FEATURE	ACTIVE FEATURE
LDW	 LANE DEPARTURE WARNING	 LANE KEEPING ASSIST
ACC	 ADAPTIVE CRUISE CONTROL	 COLLISION AVOIDANCE SYSTEM
RCW	 REAR COLLISION WARNING	 PARKING ASSIST
BSD	 BLIND SPOT DETECTION	 BLIND SPOT INTERVENTION
AVM	 AROUND VIEW MONITORING	 AUTOMATIC PARKING
NVS	 NIGHT VISION SYSTEM	 NIGHT VISION ASSIST

Work Area Requirements

Calibration procedures should be performed inside, on a level floor. Some vehicles require targets to be placed 20 feet away from the vehicle. During other procedures, the alignment should be performed with bright background light; uneven surfaces, poor lighting or shadows might affect a calibration.

CAMERA & SENSOR CALIBRATION

Precise calibration is needed after common repair procedures like bumper or windshield replacement, otherwise these Important safety systems will not work properly.

CSC0601/03	Nissan LDW
CSC0601/07	Hyundai / Kia Lane Maintenance

ADAS MS909

If you buy the ADAS Package, but don't have an existing Autel diagnostic tool then it is possible to buy a MS909 at the same time. To add the software to an existing tool, you must be in software updates.

PLEASE CONTACT US FOR ADDITIONAL PATTERNS.
