IA600 CAMERA PACK

ADAS Calibration Only Version

£10,995

excl. VAT

The IA600 Camera Pack is perfect for mobile use or location within the workshop.

- ✓ 2 Year Warranty
- ✓ Computerised Camera Setup
- ✓ Comprehensive Calibration Reporting
- ✓ Full ADAS System Coverage
- ✓ Static and Dynamic Calibration Support

LOOKING FOR MORE INFO?

For additional details, please scan the QR code on the right to access the complete specifications and comparison on our website.

Building on the original Autel calibration frame, the new IA600 Camera Pack now offers **computerised camera setup** saving time and increasing accuracy along with a fully documented reporting to show Pre / Post Scans, calibration results and tool setup making it one of the most **comprehensive ADAS calibration** reports to date.

It's designed for the technician who needs to be able to calibrate all ADAS systems including Lane Departure Warning, Adaptive Cruise Control, Rear Collision Warning, Night Vision, Blind Spot and Radar/Camera collision avoidance systems. The IA600 even documents the **correct positioning of the ADAS frame** prior to allowing calibration, which records the correct and accurate steps taken by the technician during the process.

The IA600 Camera Pack is sold with a '**full bundle**' which includes Camera setup configuration (just like the advanced IA900) plus various patterns and boards packaged together to save the customer money.

There is also an extensive range of extra specialist **patterns, boards and simulators** to enable the technician to calibrate many static ADAS functions.

The Autel ADAS software will also enable the technician to undertake **dynamic calibrations**, where the car must be put in learn mode, but does not require the use of an ADAS frame.

All the components of the list **cannot be sold individually**. The Camera Edition FULL KIT package **does not** include the diagnostic tool. To use the MaxiSys ADAS systems it is necessary to have a diagnostic tool from the MaxiSys line. To enable ADAS calibration function, ADAS Activation will be supplied with the **Calibration Frame**. If a customer has an existing tool, it **must be** in an active software subscription to allow the ADAS software to be added.
